

APC Pharmaceuticals & Chemicals (Europe) Ltd to Provide Pharmacovigilance Solutions to Crescent Pharma Limited

LONDON, UK – 15 January 2010 – APC Pharmaceuticals & Chemicals (Europe) Ltd (APC) announced that Crescent Pharma Limited is outsourcing its drug safety operations to APC.

Crescent Pharma is an established UK registered generic pharmaceutical company with a wide range of experience in the development, quality control and marketing of solid and liquid oral products within the UK. The Company is a Marketing Authorisation Holder for a vast range of products and is experienced within the generic market, covering many therapeutic areas including antibiotics and painkillers.

APC is a leading global provider of comprehensive drug safety, regulatory services and risk management programs for pharmaceutical, biotechnology, medical device and consumer products companies.

The regulatory requirements for drug safety monitoring are becoming more complex within the International Conference of Harmonization (ICH) regions. As a result, pharmaceutical companies need to devote greater resources and budget to manage their compliance with pharmacovigilance regulatory requirements. APC's team of pharmacovigilance experts provide a complete range of services using the latest state-of-the-art technology. This service is based on a fully electronic platform which is compliant with ICH-E2B (EU) and 21 CFR part 11 (US-FDA) regulatory requirements. This is further supported by a trained and dedicated pharmacovigilance team managed by people who have extensive experience and expertise in managing drug safety compliance.

About APC Pharmaceuticals & Chemicals (Europe) Ltd

APC offers broad capabilities, deep expertise and unique resources in all areas of drug safety/pharmacovigilance, marketing, safety and regulatory. APC provides accurate and timely services that help pharmaceutical and biotech companies worldwide manage risk and change effectively. With an enviable track record and a long, satisfied client list, APC is dedicated to customers' safety and regulatory compliance.
